EDUCATION

BS, Data Science and Economics, Knox College, Galesburg, IL | GPA: 3.45/4.00

June 2029

TECHNICAL SKILLS

AI & Workflow Tools: Claude API, Cursor, Replit, Anthropic SDK, Prompt Engineering, AI System Design

Programming & Data: Python, SQL, JavaScript, React, Jupyter Notebook, Git, Excel, JSON, REST APIs

ML & Analytics: scikit-learn, XGBoost, LightGBM, SHAP, Optuna, Streamlit, Feature Engineering

Workflow & Operations: Data Pipeline Design, Behavioral Analytics, Funnel Analysis, Reporting Automation

PROJECTS

MindfulCart | React · Vite · Express · Chrome Manifest V3 · Anthropic API · Canvas API

- Won 1st place at Augustana College's hackathon by building an AI-powered Chrome extension in 24 hours, leading backend development and integrating the Claude API for real-time purchase summaries and spending insights
- Designed prompts and system instructions to generate personalized recommendations, mood-based decision prompts, and spending visualizations using the Canvas API

Loan Approval Predictor | Python · scikit-learn · XGBoost · LightGBM · SHAP · Optuna · Streamlit · Fairlearn

- Trained and compared five machine learning models using 1.3 million real loan records, reducing 150+ raw features to 15 key inputs through automated feature selection and Optuna hyperparameter tuning across 50 trials
- Built and deployed a Streamlit web app with a real time What-If explorer, SHAP explainability, and a Fairlearn audit that identified a 28% true positive rate gap across U.S. states, making model insights easier to understand and interpret

EXPERIENCE

Junior Developer & Web Developer Intern, Blanxer (Remote Contract)

Jan 2022 – Mar 2023

- Engineered scalable multi-tenant SaaS features and secure RESTful APIs that reduced server response times by 30%, mastering code-profiling techniques alongside Lead Developers to optimize system latency.
- Built automated Python (Pandas) pipelines and SQL queries to analyze 1,000+ monthly user interactions, implementing strict defensive programming and PEP 8 standards to eliminate data formatting errors.
- Modeled quantitative consumer behavioral funnels and relational database schemas, tracking 3+ global digital touchpoints to successfully isolate friction points and improve platform engagement by 25%.

Operations Assistant & Business Operations Support, Everest Thanka Treasures

Mar 2025 – June 2026

- Designed robust relational database schemas and data storage architectures to manage high-value product inventories, mastering structured data modeling to ensure absolute backend data integrity across 4 core departments.
- Built quantitative behavioral algorithms and conversion-funnel models tracking 3+ global digital touchpoints, learning how to isolate navigational drop-offs and optimize application architecture to boost platform engagement by 25%.

Finance Intern, Hotel Country Villa

Mar 2023 – Feb 2024

- Developed multi-currency financial projection models and transaction workflows, mastering how to systematically trace data anomalies across local and foreign revenue streams to protect net operating margins.
- Authored comprehensive variance reports and automated Excel pipelines that integrated 3+ fragmented financial sources, reducing manual processing time by 30% while translating complex trends into structured insights for executives.

English Teacher / Instructor, Bayoca Community School

Mar 2024

- Demonstrated strong communication and educational evaluation skills by breaking down complex, abstract linguistic concepts into structured, simplified, step-by-step instructional modules.
